

OMAR TORBI

Computer Engineering Student — Seeking a Final-Year Internship (Starting February 2027)

+212 612892619 — torbi.dev@outlook.com — LinkedIn — GitHub — Portfolio

PROFILE

Final-year engineering student at EMSI Rabat, majoring in Digital Development and Information Systems, with a focus on full-stack development, modular architectures using Spring Boot and React, and the integration of 3D and artificial intelligence solutions. Oracle Cloud Infrastructure DevOps Professional and Architect Professional certified. Seeking a six-month final-year internship starting in February 2027 to design scalable web applications and secure REST APIs.

EDUCATION

State Engineering Degree in Computer Science and Networks (DDSI) <i>Moroccan School of Engineering Sciences (EMSI)</i>	2022 – Present Rabat
Baccalaureate in Physical Sciences <i>Lycée El Amria</i>	2022 Beni Mellal

PROFESSIONAL EXPERIENCE

Full-Stack & 3D Software Developer Intern <i>ZAHIRI METAL</i>	Summer 2026 — 2 months
- Designed a production-oriented web CAD platform for industrial tube design and fiber laser cutting preparation. - Developed responsive interfaces and interactive 3D visualization modules using React, Three.js, and OpenCascade.js. - Implemented geometry processing, model validation, and STEP export workflows to ensure compatibility with Tube Pro.	
Software Engineering Intern <i>National Office for Food Safety (ONSSA)</i>	Summer 2025 — 1 month
- Analyzed internal information systems and identified improvements to optimize administrative workflows. - Collaborated with technical teams to translate operational requirements into actionable software specifications. - Documented functional requirements, data flows, and implementation priorities for maintainable internal tools.	

MAJOR PROJECTS

Elevate	Spring Boot, React, MySQL
- Built a recruitment ecosystem connecting recruiters, candidates, job listings, and application workflows. - Implemented secure role-based access control (RBAC) and real-time application tracking. - Designed modular REST APIs and relational data models to support maintainable backend evolution.	
Sofia — Intelligent Library Platform	Spring Boot, React, Gemini API, ChromaDB
- Developed a digital library integrating document management, semantic search, and AI-powered summarization. - Integrated the Gemini API and ChromaDB to improve contextual search and knowledge discovery. - Structured frontend and backend modules to clearly separate search, storage, and AI services.	
TikTok Scraper & Email Automation	n8n, Python, Zoho Mail
Designed an automated workflow combining a TikTok scraper developed in Python with email delivery through Zoho Mail, orchestrated using n8n.	
True Shuffler	Spotify API, JavaScript
- Developed a music playback utility that interacts with Spotify APIs and the user's music library. - Implemented fair randomization algorithms and pagination logic for large playlists.	

TECHNICAL SKILLS

Programming Languages:	Java, C++, Python, JavaScript, TypeScript, PHP, C, SQL, PL/SQL
Backend:	Spring Boot, Laravel, Django, Firebase, Supabase, REST APIs
Frontend & 3D:	React, Next.js, Three.js, OpenCascade.js, HTML5, CSS3, Bootstrap
DevOps & Cloud:	Git, Docker, Linux, Oracle Cloud Infrastructure (OCI)
Automation:	n8n, automated workflows, web scraping with Python
Architectures:	OOP, MVC, modular architecture, RBAC, microservices
Databases:	Oracle DB, PostgreSQL, MySQL, MongoDB
AI & Data:	RAG architectures, LLM integration, vector databases, semantic search, TensorFlow, Pandas, NumPy
Soft Skills:	Problem-solving, teamwork, adaptability, technical documentation, Agile methodologies

CERTIFICATIONS

- OCI DevOps Professional (1Z0-1109-26)
- OCI Architect Professional (1Z0-997-26)

LANGUAGES

Arabic (Native) • French (Professional) • English (Fluent)
